

# AIRCHEK TOUCH

The SKC AirChek TOUCH is the first personal sample pump to have a colour touch screen display. This provides the user with an intuitive, touch interface to navigate the pump's various functions. The use of colour draws attention to the various items of information displayed, such as the run/stop key, real time flow rate and alarms. The backlit screen has a protective cover and there is a security locking system to prevent tampering during sampling.

- Colour touch screen navigation with easy programming
- Compact, lightweight design
- Extended flow range, 5 to 5000 ml/min, suitable for dust sampling and vapour sampling
- Patented\* isothermal internal flow sensor
- Powerful Li-ion battery for long run times
- Large backlit LCD with protective screen cover
- Highly visible pump run and fault status LEDs
- Automatic, hands free calibration using CalChek
- DataTrac® Pro PC software for easy pump and data management
