## RADON SCOUT HOME

The Radon Scout Home is designed for long-term monitoring of radon levels in indoor air. Tenants or landlords, homeowners and housing associations alike can use it to reliably record radon concentrations over a period of years and to record fluctuations in values due to weather and seasonal conditions.

In addition, sensors measure temperature and humidity, enabling an evaluation of the indoor climate.

### All plus points of the Radon Scout Home at a glance

- Clear text display with backlight
- Radon, humidity and temperature measurement
- High quality housing
- Battery and mains operation
- USB interface
- Time resolved measurement
- Large data memory
- Can be used in workplaces and living rooms
- Professional application software Radon Vision
- Transfer of the measured values on the own computer to the larger representation with the help of the software Rooms
- Measuring range: 0 - 10,000,000 Bq/m<sup>3</sup>
- Language options of the LED display: German, English or Spanish
- Optionally with CO<sub>2</sub> sensor or air pressure sensor
- Factory calibration with optional certificate at extra charge
